

Status Codes

Risk Adjustment Coding Guide

Status codes, such as transplants, ostomies, and amputations are codes that influence a patient's health but are not an acute illness or injury. **It is important to document and code these at least once per calendar year**, since the HCC diagnoses are "wiped clean" every year on January 1st.

Transplants:

Ostomies:

Dx Code	Description	Dx Code	Description
Z94.0	Kidney transplant status	Z93.0	Tracheostomy status
Z94.1	Heart transplant status	Z93.1	Gastrostomy status
Z94.2	Lung transplant status	Z93.2	Ileostomy status
Z94.3	Heart and lungs transplant status	Z93.3	Colostomy status
Z94.4	Liver transplant status	Z93.4	Other artificial openings of gastrointestinal tract status
Z94.81	Bone marrow transplant status	Z93.50	Unspecified cystostomy status
Z94.82	Intestine transplant status	Z93.51	Cutaneous-vesicostomy status
Z94.83	Pancreas transplant status	Z93.52	Appendico-vesicostomy status
Z94.84	Stem cells transplant status	Z93.59	Other cystostomy status
Z95.811	Presence of heart assist device	Z93.6	Other artificial openings of urinary tract status
D84.821	Immunodeficiency due to drugs	Z93.8	Other artificial opening status

Amputations:

Please select code based on laterality - right sided codes shown below for example

Dx Code	Description
Z89.411	Acquired absence of right great toe
Z89.421	Acquired absence of other right toe(s)
Z89.431	Acquired absence of right foot
Z89.441	Acquired absence of right ankle
Z89.511	Acquired absence of right leg below knee
Z89.611	Acquired absence of right leg above knee
G54.6	Phantom limb syndrome with pain
G54.7	Phantom limb syndrome without pain

HIV/AIDS:

DX Code	Description
B20	Human immunodeficiency virus [HIV] disease
Z21	Asymptomatic human immunodeficiency virus [HIV] infection status
