TH Medicare Wellness Visit SmartText

Subjective

Two Apphf is a 71 y.o. female who presents for an Annual Medicare Visit {MWV visit types:25179}

HPI

Current Providers List:
Patient Care Team:
Steven Bolton, MD as PCP - General (Family Medicine)
Steven Bolton, MD as PCP - SE MI MSSP T1 IHA (Family Medicine)

Risk Assessments

- There is no height or weight on file to calculate BMI. The BMI {BMI plan (MU NQF measure 421):19504}
- Fall Risk: Have you fallen in the past year? yes. Are you worried about falling? no.
- Depression Risk Score: 15
-

Depression Severity: None-minimal
Proposed Treatment Actions: None

Hearing
Whisper Test: PASS With Hearing Aids

Vision Screening
Was a Snellen eye exam done?: Yes
Vision Performed: : Without correction
Right Eye: 20/100
Left Eye: 20/70
Both Eyes: 20/50

Health Status
In general, the patient reports health as: good
In general, patient reports life as: good
Patient reports sleep pattern as: up all night
Have you seen a dentist in the last year?: No

Medicare Wellness Navigator

The screenshot displays the Medicare Wellness Navigator interface. On the left is a vertical sidebar with a list of menu items: Visit Info, Chaperone Docu..., Vital Signs, Allergies, Verify Rx Benefits, Outside Meds, Medication Review, Pt. Reviewed, History, Questionnaires, Problem List, Hearing/Vision (highlighted), STEADI Fall Risk, Mini Cog, ADLs and IADLs, Health and Safety, PHQ2/PHQ9, Visit Diagnoses, SmartSets, Charge Capture, Care Teams, Follow-up, and Communications. The main content area is titled 'Medicare Wellness' and features a 'Hearing/Vision' tab. Below this tab, there are fields for 'Time taken' (1541) and a date '5/17/2021'. A 'Values By' field is also present. The 'Hearing' section includes instructions and a 'Whisper Test' with buttons for 'PASS', 'PASS With Hearing Aids', and 'FAIL'. The 'Vision Screening' section has a 'Was a Snellen eye exam done?' question with 'Yes' and 'No' buttons. Below these are 'Restore', 'Close', and 'Cancel' buttons. The 'STEADI Fall Risk' section is highlighted with a green checkmark. It contains a 'Fall Screening' section with three questions: 'Fallen in the past year?', 'Feels unsteady when standing or walking?', and 'Worries about falling?'. Each question has 'yes' and 'no' buttons. Below the questions is a 'Calculated fall risk level' section with 'low', 'moderate', and 'high' buttons. The 'Fall Risk Comments' section includes a text area and a toolbar with icons for undo, redo, bold, italic, link, unlink, and insert smart text. At the bottom, there is a 'Mini COG' section with a note 'No data available.'

Hearing/Vision - STEADI Fall Risk

Whisper Test/ Snellen eye exam

Hearing/Vision

Time taken: 1448 5/17/2021 Values By

Show: ☐ Row Info ☐ Last Filed ☐ Details

▼ Hearing

1. Stand behind the patient's field of vision. 2. Gently occlude and rub the external auditory canal of the non-tested ear. 3. Ask the patient to repeat a set of 3 different numbers (6,1,9) presented to the tested ear at four decreasing levels of loudness: conversational voice at 6 inches and at 2 feet from the ear, and whispered voice at 6 inches and at 2 feet of the ear. A passing score is given if the patient can repeat all three numbers correctly at each level of loudness or achieve greater than 50% success over three successive triplet tests.

Whisper Test ☐ PASS ☐ PASS With Hearing Aids ☐ FAIL

▼ Vision Screening

☐ Was a Snellen eye exam done? ☒ Yes ☐ No

☐ Vision Performed: ☐ Without correction ☐ With correction

Mini Cog - ADLs

Mini COG

Time taken: 1452

5/17/2021

Values By

Show: ☐ Row Info ☐ Last Filed ☐ Details

Mini COG

1. Instruct the patient to listen carefully to and remember 3 unrelated words (APPLE, TABLE, PENNY) and then to repeat the words. The same 3 words may be repeated to the patient up to 3 tries to register all 3 words. This part isn't scored until you get to #3. 2. Instruct the patient to draw the face of a clock, either on a blank sheet of paper or on a sheet with the clock circle already drawn on the page. Then ask him or her to draw the hands of the clock to read 11:10. (Note: The CDT is considered normal if all number are present in the correct sequence and position, and the hands readably display the requested time). 3. Now have the patient repeat the 3 words and score accordingly.

PHQ-2/PHQ-9 Depression Screening

Depression Screening

Will the patient answer the depression risk questions?

Yes

No

Over the past 2 weeks, how often have you been bothered by feeling little interest or pleasure in doing things?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Over the past 2 weeks, how often have you been bothered by feeling down, depressed, or hopeless?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Depression Risk (PHQ-2 Score)

3

The PHQ-2 questions are scored from 0 (not at all) to 3 (nearly every day) and then added together: Score 0-1 = Not likely to be at risk for depression, Score 2-6 = At risk for depression (further screening recommended).

Pfizer Inc. No permission required to reproduce, translate, display or distribute. The PHQ9 was developed by Drs. Robert L. Spitzer, Janet B.W. Williams, Kurt Kroenke and colleagues, with an educational grant from Pfizer Inc. No permission required to reproduce, translate, display or distribute.

Additional Depression Screening

Over the past 2 weeks, how often have you been bothered by trouble falling or staying asleep, or sleeping too much?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Over the past 2 weeks, how often have you been bothered by feeling tired or having little energy?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Over the past 2 weeks, how often have you been bothered by a poor appetite or overeating?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Over the past 2 weeks, how often have you been bothered by feeling bad about yourself - or that you are a failure or have let yourself or your family down?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Over the past 2 weeks, how often have you been bothered by trouble concentrating on things, such as reading the newspaper or watching television?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Over the past 2 weeks, how often have you been bothered by moving or speaking so slowly that other people could have noticed? Or the opposite - being so fidgety or restless that you have been moving around a lot more than usual?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Over the past 2 weeks, how often have you been bothered by thoughts that you would be better off dead or of hurting yourself in some way?

0=Not at all

1=Several days

2=More than half the days

3=Nearly every day

Depression Risk Score

8

The PHQ-9 questions are scored from 0 (not at all) to 3 (nearly every day) and then added together: Score 0-4 = None or minimal depression severity, Score 5-9 = Mild depression severity, Score 10-14 = Moderate depression severity, Score 15-19 = Moderately severe depression severity, Score 20-27 = Severe depression severity.

How Difficult

If you checked off any problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people?

Not difficult at all

Somewhat difficult

Very difficult

Extremely difficult
